Growth trend in 2020 continues: IDL on the way to the highest annual sales in company history

IDL Group continued its successful course in the third quarter of 2020. From January to September, the market leader on software for Financial Performance Management recorded the highest license sales in company history as well as a double-digit growth in total sales compared to the previous year.

IDL is thus on the way to achieving the highest annual sales in its 30-year company history by the end of the year. The software provider benefits from meeting the current requirements of internationally operating companies in the area of digitalization: With comprehensive possibilities for intercompany reconciliation or the certified connection to SAP S/4 HANA, financial processes in Group accounting and Group controlling can be automated throughout, thus enabling the changeover to intelligent, modern Financial Performance Management.

A family office, medium-sized companies and corporations from the high-tech, manufacturing, construction, healthcare and retail industries as well as another professional sports club became new customers who use IDL software for consolidation, planning, reporting and analysis in the third quarter of 2020.

"Our ability to achieve such a positive result in our thirtieth business year under such difficult circumstances is a real success story and an incredible team effort by our employees, of which I am personally very proud," said Bernward Egenolf, Chief Executive Officer of IDL Group. "We are looking forward to welcoming our customers to this year's user conference

on November 9 and 10 as part of an online event. There, we will present the new release of our software and learn why more and more of our customers are becoming real 'IDL fans' through presentations by our users."
